

Guidelines for Submitting Coding Assignments

1. Code and figures should always be submitted as a single PDF, never as stand alone files in a zip drive.
2. Code should be commented. No need to comment each line, but sections of the code should be explained with comments
3. Figures should include (i) labeled axes (ii) titles (iii) legends
4. When submitting to Gradescope, please select the corresponding PDF pages of figures and code for each question.
